

Technical specification

Shock absorbing rubber tiles - colored SBR granules

Manufactured from colored SBR granules, rubber floor tiles feature superior flexibility and durability, wear, high traffic, heavy loading and weather resistance.

Size: 400 x 400 mm

Thickness: 20, 25, 30, 40 mm

Colors: Red, green, blue, orange, yellow, gray

Features:

- Modular and elastic;
- Durable and long-lasting;
- Shock absorbing;
- Noise reducing;
- Resistant to: Heavy Impact Loads, Slip and falls, Changes in Temperature, Fire and Burn.

Applications:

- Children and Sport Playgrounds;
- Parks & Recreational areas;
- Sidewalks, Patios; Walkways;

- Swimming pool surrounds;
- Sport Courts, Golf Courses;
- Fitness centres; Home gyms
- Garages; Terraces, Basements, Roofs;
- Weight Rooms; Production, Storage Areas;
- Pedestrian overpasses, underpasses;
- Horse stalls, farms;
- Shooting Ranges.

Installation: Two component Polyurethane Adhesive. This method results in an extremely durable floor and is a good choice for high traffic areas.
